Discussions

1. Frequency of the data received? Sources? What is the procedure?

2. How big is the data? In term of data type, volume and size?

3. Data loading, QC and resources?

4. How you do the marketing and promotion?

5. How you do the licensing round?

6. Which application that mostly used for your licensing round?

7. How long it take to prepare the data room?
